

"A fascinating foray into an exotic world."

Publishers Weekly

In this beautiful commemorative edition, with photos, illustrations, and a new foreword by Michael H. Cohen, Pulitzer Prize-winner John E. Mack M.D. powerfully demonstrates how the alien encounter phenomenon calls for a revolutionary new way of examining the nature of reality and our place in the cosmos.

"*Passport to the Cosmos* breaks new ground ... A credible work on an incredible topic and worth reading."

— **Albert A. Harrison, Ph.D.**, National Institute for Discovery Science

"*Passport to the Cosmos* is a monumental—I almost want to say, definitive—contribution to our understanding of the meaning of extraordinary experiences." — **Kenneth Ring, Ph.D.**

"Dr. Mack has earned the right to be accorded some consideration." — **Mensa Bulletin**

"John Mack and I became close friends when, in 1990, I first introduced him to the complexities of UFO abductions. By the time of his death, he had moved to a more spiritualistic view of these traumatic experiences, and *Passport to the Cosmos* remains an eloquent, insightful statement of his approach to an extraordinary phenomenon." — **Budd Hopkins**

ABOUT THE AUTHOR

Esteemed professor of psychiatry at Harvard Medical School and Pulitzer Prize-winning author John E. Mack, M.D. devoted the latter part of his life to the exploration of how alien encounters affect personal and global transformation.
